

Notice of Allowability

Application No.

10/813,083

Examiner

Shawn Riley

Applicant(s)

TAKADA, KOJI

Art Unit

2838

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 31 March 2004 filing.
2. ☒ The allowed claim(s) is/are 1-5.
3. ☒ The drawings filed on 31 March 2004 are accepted by the Examiner.
4. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☒ All b) ☐ Some* c) ☐ None of the:
 1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
 6. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) ☐ hereto or 2) ☐ to Paper No./Mail Date _____.
 - (b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.
- Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).
7. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☒ Notice of References Cited (PTO-892)
2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
3. ☒ Information Disclosure Statements (PTO-1449 or PTO/SB/08),
Paper No./Mail Date march04
4. ☐ Examiner's Comment Regarding Requirement for Deposit
of Biological Material
5. ☐ Notice of Informal Patent Application (PTO-152)
6. ☐ Interview Summary (PTO-413),
Paper No./Mail Date _____.
7. ☒ Examiner's Amendment/Comment
8. ☐ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____.

SHAWN RILEY
PRIMARY EXAMINER

DETAILED ACTION

1. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Replace the entire abstract with the following;

A switching power supply includes a rectifying circuit for rectifying an AC voltage, a smoothing capacitor for smoothing an output of the rectifying circuit, a series switch circuit formed by a first switch and a second switch connected between two electrodes of the smoothing capacitor, a transformer for inducing a voltage to be an output at a secondary winding as the first switch is turned on/off and the second switch is turned on/off in a complementary manner with the first switch, and a series circuit formed by a primary winding of the transformer connected between a connection point of the first switch and the second switch and one terminal of the smoothing capacitor, and a resonance capacitor, wherein a first magnetic element connected between a positive electrode obtained by rectifying the AC voltage and an intermediate tap of the primary winding is provided, the resonance capacitor is connected to the connection point of the first switch and the second switch, and the

primary winding is connected to the positive electrode of the smoothing capacitor.

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: No prior art uncovered anticipates or renders obvious applicant(s) claimed switching power supply including transformer for inducing a voltage to be an output at a secondary winding as the first switch is turned on/off and the second switch is turned on/off in a complementary manner with the first switch, and a series circuit formed by a primary winding of the transformer connected between a connection point of the first switch and the second switch and one terminal of the smoothing capacitor, and a resonance capacitor, wherein a first magnetic element connected between a positive electrode obtained by rectifying the AC voltage and an intermediate tap of the primary winding is provided, the resonance capacitor is connected to the connection point of the first switch and the second switch, and the primary winding is connected to the positive electrode of the smoothing capacitor.
2. No prior art uncovered anticipates or renders obvious applicant(s) claimed switching power supply including a transformer for inducing a voltage to be an output at a secondary winding as the first switch is turned on/off and the second switch is turned on/off in a complementary manner with the first switch, and a series circuit formed by a primary winding of the transformer connected between a connection point of the first switch and the second switch and one terminal of the smoothing capacitor, and a resonance capacitor, wherein a first magnetic element connected between a positive

Art Unit: 2838

electrode obtained by rectifying the AC voltage and a connection point of the primary winding and the resonance capacitor is provided, the resonance capacitor is connected to the connection point of the first switch and the second switch, and the primary winding is connected to the positive electrode of the smoothing capacitor.

3. No prior art uncovered anticipates or renders obvious applicant(s) claimed switching power supply including a transformer for inducing a voltage to be an output at a secondary winding as the first switch is turned on/off and the second switch is turned on/off in a complementary manner with the first switch, and a series circuit formed by a primary winding of the transformer connected between a connection point of the first switch and the second switch and one terminal of the smoothing capacitor, and a resonance capacitor, wherein a first magnetic element connected between a positive electrode obtained by rectifying the AC voltage and a high-frequency AC voltage source in the switching power supply is provided, the resonance capacitor is connected to the connection point of the first switch and the second switch, and the primary winding is connected to the positive electrode of the smoothing capacitor.

4. No prior art uncovered anticipates or renders obvious applicant(s) claimed switching power supply including a transformer for inducing a voltage to be an output at a secondary winding as the first switch is turned on/off and the second switch is turned on/off in a complementary manner with the first switch, and a series circuit formed by a primary winding of the transformer connected between a connection point of the first switch and the second switch and one terminal of the smoothing capacitor, and a resonance capacitor, wherein a first magnetic element connected between a high-

Art Unit: 2838

frequency AC voltage source in the switching power supply and a negative electrode obtained by rectifying the AC voltage is provided, the resonance capacitor is connected to the connection point of the first switch and the second switch, and the primary winding is connected to the negative electrode of the smoothing capacitor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

2. Claims 1-5 are allowable over the prior art of record.

Conclusion

Any inquiry from other than the applicant/attorney of record concerning this communication or earlier communications from the Examiner should be directed to the Patent Electronic Business Center (EBC) at 1.866.217.9197. Any inquiry from a member of the press concerning this communication or earlier communications from the Examiner or the application should be directed to the Office of Public Affairs at 703.305.8341. Any inquiry from the applicant or an attorney of record concerning this communication or earlier communications from the Examiner should be directed to Examiner Riley whose telephone number is 571.272.2083. The Examiner can normally

Art Unit: 2838

be reached Monday through Thursday from 7:30-6:00 p.m. Eastern Standard Time. The Examiner's Supervisor is Mike Sherry who can be reached at 571.272.2084. Any inquiry about a case's location, retrieval of a case, or receipt of an amendment into a case or information regarding sent correspondence to a case **should be directed to 2800's Customer Service Center** at 571.272.2815. Any papers to be sent by fax MUST BE sent to fax number 703.872.9306. Any inquiry of a general nature of this application should be **directed to the Group receptionist** whose telephone number is 571.272.2800. Status information of cases may be found at <http://pair-direct.uspto.gov> wherein unpublished application information is found through private PAIR and published application information is found through public PAIR. Further help on using the PAIR system is available at 1.866.217.9197 (Electronic Business Center).
